"Citylife innovations LLC", Saint-Petersburg
Position: iOS TeamLead
Company type: Own products development

Contact person: Sergey Rabinovich, CTO (+7 906 248-8292, @angel_rsa)

https://apps.apple.com/ru/app/citytok/id1496104244

Responsibility areas:
- Development process establishing in team (current issues resolving, bottlenecks and weak places identifications, team development speed and predictability increase)
- Team motivation
- Team members learning and mentoring
- Project architecture optimization
- All activities related to products delivery (programming, builds delivery, releases planning)
- Development process establishing during two products merge into one
- Technical issues resolving during products merge phase (project configuration, setup, builds delivery)

Results of the work:
- Project build time reduced from 15 to 3 mins
- Code review process established
- Team coding standard established
- Features delivery time became predictable, team working process became more transparent for managers
- Technical levels of team mates increased
- I performed code migration from stand-alone application into existing project (during business merge)
